

The introduction of ExxonMobil Signature Polymers signals a new era of collaboration

We recognize the challenges the future may bring and that the best way to address them is through partnership and collaboration across the value chain. Over time you will see changes in the way we work with you, the support that we provide, and the levels of expertise we contribute to enable you to deliver innovative solutions to your customers.

All of our polymers are now positioned under a single portfolio brand. We are working to simplify our product architecture and naming to improve portfolio navigation. Over the next year we will transition some of our brands and grade names to better reflect the attributes and benefits they provide. Our high quality products aren't changing, just the names.

Our major performance polymer brands

Exceed™ performance polymers for high performance
including Stiffness, Toughness and Processability (Flow)

Exxtra™ performance polymers for enhanced performance
including Softness, Sealing and Adhesion

ExxonMobil™ for traditional core performance

Vistamaxx™ performance polymers for a versatile polymer modifier
that can be used in practically all conversion processes

Exact™ plastomers for polymer modification
that bridge the gap between elastomers and plastics

Brand names that will be retired

Enable, Optema, Exceed S, Exceed XP, Escor, Escorene Ultra, Achieve, Paxon, and Nexxstar

Brand names that are transitioning to Exceed

Most Exceed S, Exceed XP, Achieve, Performance Polypropylene and Paxon products will now fall under Exceed. Most existing Nexxstar, Escorene and base LDPE, HDPE, C4LL, C6LL products will now fall under the ExxonMobil™ brand.

New brand introduction

Exxtra™ performance polymers: designed to enhance specific attributes such as adhesion and softness. Most current Optema, Escor and some Exact grades will transition to Exxtra.

HD	Density	2 numbers (0.9DD)	MI: frac melt	2 numbers (M.M)	If needed	.	.	existing
			MI ≥ 1-9.9	2 numbers (M.M)				
			MI > 10-99	3 numbers (MM.M)				
Linear Low Density Polyethylene (mLL, C4LL, C6LL)	MI < 10	2 numbers (M.M)	Density	2 numbers (0.9DD)	If needed	.	.	existing
